

I can't believe that certain people are lobbying against the greatest invention that I have ever used. We live in S.E. Ohio and you can not even pick up a decent radio station all the static and all. I like talk radio and the Nascar channel you cannot find these on our local radio, my husband is a long hual truck driver and he loves his XM. He says by the time you find a decent station you lose it in the next 20 miles. Also we get our weather off the Weather Channel not a local radio station.

I have invested in 4 XM radios for personal use and actually bought several thousand \$\$ of their stock when it IPO. The govt needs to stay out of this it's a PAID service.

Sincerely

Patricia D. Davis
